

SiteHawk Introduces New Chemical Inventory Solution

VeriScan streamlines chemical inventories and enhances MSDS compliance initiatives

Nashville, TN (January 31, 2011) – SiteHawk is pleased to announce the next-generation release of VeriScan™, the advanced [chemical inventory](#) solution that streamlines chemical inventory processes via hand-held tablets and barcode scanning software.

VeriScan complements SiteHawk's existing MSDS management solutions by enabling companies to automate the chemical physical inventory process and reconcile those results directly to their [MSDS database](#). The barcode scanning system accelerates the search, input, and identification process for chemical inventories.

“Getting an accurate picture of what materials are onsite, where they are located, and how much is on hand is the first step towards best practices chemical management,” commented Kraig Haberer, COO for SiteHawk. “VeriScan enables faster, simpler chemical inventory management.”

About SiteHawk

SiteHawk offers a complete approach to MSDS and chemical data management via web-based, user-friendly software and managed services. Organizations in virtually every industry utilize SiteHawk solutions to manage their hazard communication programs, meet regulatory and environmental compliance initiatives, manage chemical inventories and chemical data, publish material safety data sheets, and keep workers safe throughout the organization. With customers spanning the globe, SiteHawk continues to lead the environmental health and safety industry in customer satisfaction with a greater than 98% customer retention rate.
