

## Labels and Barcodes

**Promote risk avoidance. Manage efficient inventory and chemical data visibility.**

SiteHawk understands that labeling needs vary across industries, corporations and even within facilities. SiteHawk provides a robust labeling solution with user-friendly and flexible tools for your organization.

With SiteHawk, you can save time and resources by configuring and printing pre-populated labels in GHS, WHMIS, HMIS and NFPA formats to sheet and roll printers. Select from a variety of label templates and configure label content, manage custom labels or utilize a label wizard to configure the arrangement, size and content of your labels. Use SiteHawk labeling to standardize formats and identifiers or provide flexibility to meet diverse needs across your organization. QR codes can also be placed on labels to provide a scannable direct link to a unique SDS.

SiteHawk's barcode functionalities enable users to connect and print existing barcodes to materials. Using SiteHawk's labeling and barcode features, organizations can quickly and easily maintain safety and compliance by making chemical data readily available and visible to all workers.

- ✓ Utilize barcode features to promote efficient and accurate inventory tracking processes.
- ✓ Save time by generating pre-populated labels with QR codes, providing scannable links to a material.
- ✓ Provide flexibility to configure and customize labels to meet your needs.
