

QuickSEARCH

Fast access to chemical data when it matters most.

QuickSEARCH is considered one of the fastest and most user-friendly functions for searching, viewing and printing SDSs. This feature search engine enables users to search across multiple phrases in one search bar. Search criteria is cross referenced, providing thorough results.

Searches include Chemical Name, Manufacturer Name, Synonyms, CAS Numbers, Barcode, Site Number, UN Number, Ingredients and associated searchable properties, such as facility-specific identifiers. By default, **QuickSEARCH** searches corporate/facility Notebooks. Users can also search SiteHawk's Master Catalog of Safety Data Sheets. Results are viewed immediately and can be exported for offline use.

- ✓ Refine results and save time by utilizing multiple search phrases in one search.
- ✓ Search within facilities, across corporations or within SiteHawk's Master Catalog.
- ✓ View results immediately and export to spreadsheets.
